IV International Conference

# «SUSTAINABILITY AND LEGACY IN SPORT: CHALLENGES AND PERSPECTIVES»

## PROGRAM

November 26-27, 2020  
Kyiv, Ukraine

## GREETINGS

from Acting Minister of Ukraine on Education and Science  
SERHIY SHKARLET

*On behalf of the Ministry of Education and Science of Ukraine, I am pleased to welcome the participants of IV International Conference "Sustainability and Legacy in Sport: Challenges and Perspectives".*

*It is important to state that despite all the restrictions imposed due to the pandemic, the conference organizers have still found an opportunity to hold an annual scientific forum in an online format, involving well-known scientists and experts not only from Ukraine, but also from other countries. I hope that you will have great opportunity to discuss current issues in various fields of sports, recreational activities, physical culture and physical education, focusing on effective mechanisms for putting research findings in practice and implementing them in educational activities.*

*I sincerely wish you to have a fruitful exchange of experience based on the results of your research work. I am confident that, despite all the current troubles, creative traditions of international conferences will not fade, will be preserved and will receive new impetus for further development.*

Serhiy SHKARLET

## GREETINGS

from Minister of Youth and Sport of Ukraine  
VADYM HUTTSAIT

*On behalf of the Ministry of Youth and Sports of Ukraine and myself, I would like to greet the participants of IV International Conference "Sustainability and Legacy in Sport: Challenges and Perspectives". Due to the global pandemic, the conference will take place in an unusual format, namely online.*

*It is pleasant to note that among the various topics of this international conference, a prominent place is occupied by those scientific areas that are related to current challenges of modern sports and physical activity, the formation of Olympic values among younger generations in modern conditions.*

*This is stated in the Strategy for the Development of Physical Culture and Sports for the period of up to 2028, approved by the Government. One of its main tasks is to increase the percentage of the population, involved in regular physical activity, up to 30%. The implementation of the Strategy will allow applying a comprehensive approach to the development of this field using an inclusive approach and providing equal opportunities for all groups of the population; it will improve the system of athletes, coaches and managers' training. Particular attention will be paid to the development of sports infrastructure, as well as promotion and greater involvement of various population groups in regular physical education and sports.*

*Taking this opportunity, I sincerely wish the participants of this forum active and fruitful work, multiplication of previously formed traditions, relentless scientific research and successful implementation of its results in various spheres of social life and professional activity.*

Vadym HUTTSAIT

## GREETINGS

From President of National Olympic Committee of Ukraine  
**SERHIY BUBKA**

Dear friends,

On behalf of the Olympic Family of Ukraine and myself, I sincerely congratulate the participants and organizers of the International Conference "Sustainable Development and Heritage in Sports: Challenges and Perspectives".

The global challenges of 2020 have confirmed the need for the development of society pursuing the goals of sustainable development. However, the COVID-19 pandemic has once again demonstrated that sport is a crucial factor in today's global efforts to promote society development. Therefore, taking into account the problems of our time, it is very important to find ways to overcome these difficulties through the pooling of knowledge, effort and exchange of experience between professionals and states.

Sustainable development initiatives are among the key aspects of the successful implementation of the 2020 Olympic Agenda, the IOC strategic roadmap for the future of the Olympic Movement.

For its part, the NOC of Ukraine also continues to pay great attention to educational and social projects and to educate the younger generation on the principles of Olympism, Olympic and universal values.

I believe that the international forum will form new ideas and views, initiatives and proposals for further progress.

I sincerely wish the participants of the conference productive discussion and constructive decisions. New ideas, creativity and inspiration to you!

Serhiy BUBKA

## GREETINGS

From President of European University Sports Association  
**ADAM ROCHEK**

It is a great pleasure for me to greet the organizers and participants of the International Conference "Sustainable Development and Heritage in Sports: Challenges and Perspectives" and I sincerely rejoice that, despite the huge number of challenges facing universities and university sport because of the COVID-19 pandemic, this scientific forum takes place this year.

It is extremely important that the cooperation that began several years ago between the European Student Sports Association (EUSA) and the National University of Ukraine on Physical Education and Sport continues. I am proud to provide the Conference with patronage on behalf of EUSA.

I thank the Rector, the University and the organizers for their constant hard work on the development of sports and I wish all the speakers and participants to experience great pleasure during the event.

Adam ROCHEK

## GREETINGS

## From Rector of National University of Ukraine on Physical Education and Sport YEVHENIY IMAS

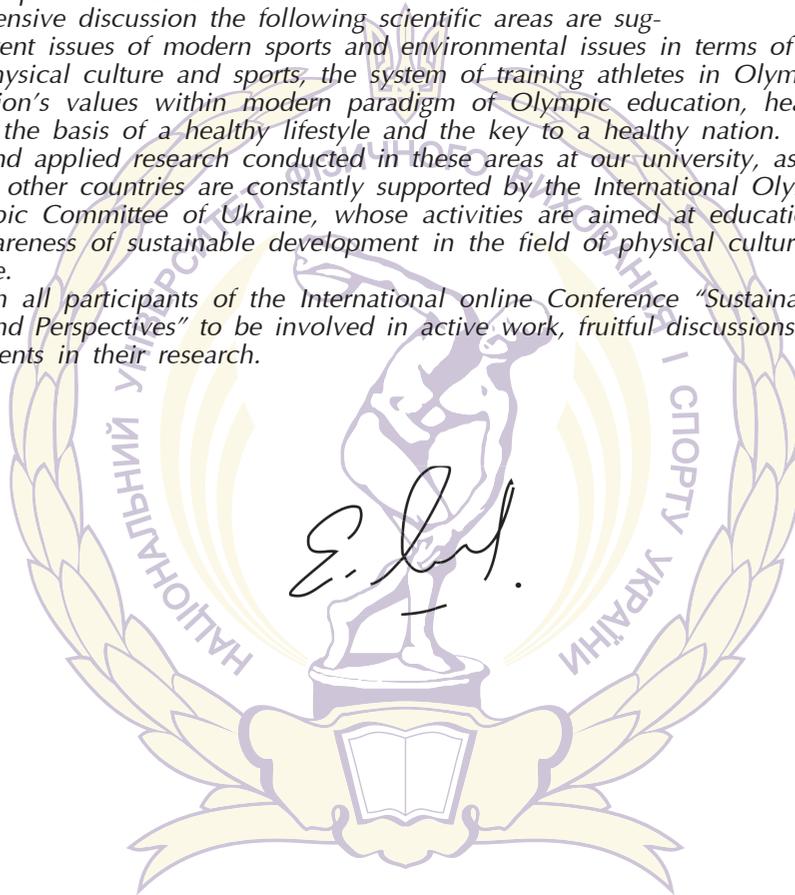

On behalf of Academic Council and all the staff of National University of Ukraine on Physical Education and Sport, I kindly greet the participants of IV International Conference "Sustainability and Legacy in Sport: Challenges and Perspectives", which is a traditional gathering of scientists and practitioners working in the field of physical culture and sports in different countries.

This year's forum participants are deprived of the opportunity to communicate in person at our university due to quarantine restrictions. However, thanks to modern means of telecommunication, representatives of scientific sports community have the opportunity to participate in the conference and take part in creative discussions.

For a comprehensive discussion the following scientific areas are suggested, namely current issues of modern sports and environmental issues in terms of sustainable development concept in physical culture and sports, the system of training athletes in Olympic sports, formation of younger generation's values within modern paradigm of Olympic education, health and recreational physical activity as the basis of a healthy lifestyle and the key to a healthy nation.

Fundamental and applied research conducted in these areas at our university, as well as cooperation with scientists from other countries are constantly supported by the International Olympic Committee and the National Olympic Committee of Ukraine, whose activities are aimed at educational work, meant to increase public awareness of sustainable development in the field of physical culture and sports as well as Olympic heritage.

I sincerely wish all participants of the International online Conference "Sustainability and Legacy in Sport: Challenges and Perspectives" to be involved in active work, fruitful discussions with colleagues and gain new achievements in their research.

Yevheniy IMAS

## NOVEMBER 26, 2020

10<sup>00</sup>–10<sup>30</sup> **OFFICIAL OPENING CEREMONY. OFFICIAL GREETINGS**

10<sup>30</sup>–12<sup>30</sup> **PLENARY SESSION**
