

Dear Friends,

University of Bologna is glad to host you in the beautiful and historical town of Rimini, for the XIII international scientific conference "Sport Kinetics 2013"

The Conference will be an occasion to bring together well renowned scientist and young scientists with practitioners in the field of sport and exercise sciences. In the today challenges for health and quality of life management, the crucial point for success is represented by insights that came from the research, as the guide for better and good practice. Globalization put on us new and challenging issues in this field. The internationality of our Scientific Committee, witnesses for the need to share knowledge at the global level, in order to improve our practice by means of the melting of sciences and of intelligences. In this light, and on the behalf of IASK, I warmly welcome you in Rimini for an exciting and meaningful experience.

TOPICS

- Biomechanics of sport
- Methodology of Training
- Sport rehabilitation
- Bioenergetics of sport and exercise
- Dance Sciences
- Motor control
