VIII International Conference

«SUSTAINABILITY AND LEGACY IN SPORT: CHALLENGES AND PERSPECTIVES»

PROGRAM

November 20-21, 2024
Kyiv, Ukraine

For the eighth consecutive time, the National University of Ukraine on Physical Education and Sport is hosting a traditional scientific forum dedicated to discussions on the social, environmental, economic, and organizational dimensions of sports, issues related to physical culture for children and youth, sports training and Olympic education, the development of choreographic arts to achieve sustainable development goals, as well as current challenges of sports medicine.

The initiator of the International Conference „Sustainable Development and Heritage in Sport” in 2017 was the Rector of the National University of Physical Education and Sports of Ukraine, Chairman of the Commission of the National Olympic Committee of Ukraine „Sustainable Development and Heritage” Yevhen Imas. This event emerged as a response to the challenges of the modern world, illustrating the synergy of sustainable development goals and physical culture and sports for a better future.

The significance of the Conference is underscored by the annual greetings of the Chairman of the IOC Commission for Sustainable Development and Legacy Prince Albert of Monaco; President of the International Council of Sport Science and Physical Education Uri Schaefer; President of the European University Sports Association Adam Rocek; Head of the International University Sports Federation Leonz Eder, along with Ministers of Education and Science, Youth and Sports of Ukraine, presidents of Ukraine’s National Olympic Committee, members of the Ukrainian Parliament, and others.

Over the past eight years, the Conference has united governmental and non-governmental organizations, more than 25 higher education and research institutions in Ukraine and around the world, educators, scholars from many countries, as well as professionals in physical culture and sports, doctoral students, postgraduates, and students.

The Sustainable Development Goals, adopted by the United Nations in 2015, represent a global action plan aimed at addressing humanity’s most pressing issues. At first glance, physical culture and sports may seem far removed from them; however, they play a significant role and are powerful tools for achieving important goals of promoting health and well-being, quality education, gender equality, reducing inequalities, sustainable urban and community development, and partnerships for sustainable development. Sport has the potential to unite people, bridge divides, and create a more equitable and prosperous society.
